Subject: RE: (CUI) RE: DIV COVID Compliance Report (29 Nov 21)

Good Afternoon Sir,

My apologies for including AR in the AC numbers, I missed an opening line in MARADMIN 462/21 (paragraph 3.a.). Our corrected numbers are as follows:

4TH MARDIV currently has 64 unvaccinated AC Marines past the 28 November 2021 deadline, and an unknown number after their waiver disposition, who may refuse vaccination between now and the deadline.

- (16) have no action registered in MRRS.
- (13) Have first dose, but will miss "full vax status" by two weeks or more.
- (4) Admin refusals (1 expired deferral).
- (8) Requested medical exemptions (2 expired deferrals).
- (17) Requested religious exemptions (8 expired deferrals).
- (1) With a temporary admin deferral.
- (1) Expired deferral (excluding previous categories).
- (4) Pending ADSEP.

Note: The units with no vaccination documentation or deferral comments for active duty members within MRRS are NOT in compliance with MARADMIN 462/21 (paragraph 3.g.) which mandates monitoring vaccination compliance via MRRS. All members in the "no action" category should have already been updated in MRRS to reflect "admin refusal" per MARADMIN 612/21 since "they are not or will not be fully vaccinated on the date(s) required by ref (a) and (b)."

4TH MARDIV currently has 4653 unvaccinated AR/SMCR Marines, and an unknown number after their waiver disposition, who may refuse vaccination between now and the deadline.

- (2527) have no action registered in MRRS.
- (1118) Have first dose and two weeks to receive their second dose before 14 December 2021.
- (599) Admin refusals (227 expired deferrals).
- (24) Requested medical exemptions (17 expired deferrals).
- (342) Requested religious exemptions (229 expired deferrals).
- (4) Temporary admin deferrals (2 expired deferrals).
- (2) Expired deferrals (excluding previous categories).
- (37) Pending ADSEP.

Gentlemen,

Stepping in off the CC line because the data here is getting blended in a way that it was never intended.

AC is AC. AC deadline was 28 November.

AR is not AC. AR is RC (with SMCR and IMA) and the RC deadline is 28 December. Do not include AR in your AC numbers. This is per the MARADMIN and FRAGO 11. If we start blending these numbers, it convolutes the data that is reported in MRRS, the expectations, and requirements. We specifically made this distinction for AC and RC when drafting both messages.

COPS – if you need to re-ask for the data from each MSC to update the numbers, please do so. The "91" "active" Marines reflected below is not an accurate representation of the AC requirements. Any of the AR personnel in that 91 need to be pushed down into the RC numbers.

I understand this seems trivial, but, hypothetically, DIV may only have 27 AC Marines who are late. Leaving 63 AR (read RC) who are actually not late – so 91 is not an accurate representation of DIV's task completion; 27 would be. And thus not an accurate report to CMFR for purposes of the O&I.

Additionally – another plug for MRRS – MRRS is still the official system of record – so the faster we get data into MRRS, the less cleanup reporting we have to do outside of MRRS. Please take a look at the first three tabs of the COVID-19 Power BI Dashboard – with special emphasis on the third tab:

<https://mfrpowerbi.mcds.mcds.usmc.mil/Reports/powerbi/COVID-19/COVID-19?rs:embed=true>

I apologize if I'm missing something here; please let me know. Hopefully this clears up the reporting requirement.
